ECN-E--10-069

1 February 2011

Acknowledgement

This report has been written with financial support from the European Environment Agency (EEA). The EEA project manager was David Owain Clubb.

The authors acknowledge the following persons for their assistance in compiling this report: Heather Haydock (AEA) and Tjaša Bole, Bernard Bulder, Joost Gerdes, Manuela Loos, Linda Pronk, Hilke Rösler, Cees Volkers, Adriaan van der Welle and Remko Ybema (all from ECN).

Several users of the data report and the database have reported problems in earlier versions of this work. All known issues have been corrected in the current report and in the database. The authors express their gratitude to all contributors.

The ECN number of the project resulting in this report is 6.00289. The authors can be contacted for enquiries, corrections or other remarks at nreap@ecn.nl.

This document has been typeset in LaTeX (http://www.latex-project.org).

Disclaimer

This report has been compiled with great care. However, since the underlying NREAP documents have originally been published in the language of the respective Member State subtleties might have been lost in the process. Moreover, the data have been entered into the database manually: although checked, it is possible that typing errors have occurred. The original NREAP documents remain the authentic versions. The Energy research Centre of the Netherlands (ECN) and the European Environment Agency (EEA) cannot assure any responsibility for any remaining errors, if and when applicable, of the data in the this report and in the underlying database.

Abstract

This executive summary presents a selection of the tables in the original report, which provides an extensive overview of all data that have been published in the National Renewable Energy Action Plans (NREAPs), including graphs and derived indicators. This executive summary only presents data tables of all 27 European Union Member States. The countries considered are: Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovenia, Slovakia, Spain, Sweden and the United Kingdom.

The executive summary highlights a selection of cross-sections of the database that has been compiled from the NREAP documents. The underlying database and the figures from the report are publicly available at http://www.ecn.nl/nreap. Moreover a separate executive summary is available from this location.

Keywords

National Renewable Energy Action Plans (NREAPs), renewable energy in the European Union

Scanning the two-dimensional barcode (QR) at the left with a camera phone equipped with appropriate software will open the URL http://www.ecn.nl/nreap, which redirects to the ECN Policy Studies project pages (http://www.ecn.nl/units/ps/themes/renewable-energy/projects/nreap). Summary

The Renewable Energy Directive (2009/28/EC)[1] addresses various subjects related to the development of renewable energies in the European Member States, among others the legally binding share of renewable energy in gross final energy consumption. In Article 4 of the Directive each Member State is requested to provide a National Renewable Energy Action Plan (NREAP) by 30 June 2010. In order to draft this plan, a template[2] was published by the Commission. Each Member State is requested to complete a set of tables in this template on how it expects to meet its 2020 target, including the technology mix and the trajectory to reach it. The current report makes use of the fact that these tables have been defined in a consistent way. All data have been collected from the NREAP documents and they are available as a data report (this report), a database containing all data from the NREAPs (in text format) and a set of figures from the datareport (in PDF and PNG). The purpose has been to allow easy comparison for further analysis by the audience[3].

The focus of this work is on the numbers and figures of the renewable energy projections. All other subjects addressed in the documents, such as renewable energy policies, costs and benefits and grid integration issues have not been considered in the current analysis. Moreover, it was not the objective of this analysis to check whether the proposed policies indeed result in the projections made.

Whereas the data report focuses on the projections for the individual Member States, this summary section focuses on the aggregate results for all European Member States: Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovenia, Slovakia, Spain, Sweden and the United Kingdom.

The charts and tables in this report present primary data (numbers directly taken from the NREAP documents) and secondary data (data derived from the primary data). For the secondary data, four parameters have been presented consistently throughout the report: an indicator on full load hours (applies to electricity options only), an indicator on growth rates calculated from the projected energy production (for electricity options also for changes in capacity), and indicators on per capita and per surface area achievement. Although for the two latter indicators a bias exists between countries depending on their population density, these indicators enable comparison of large and small countries in a more meaningful manner.

All renewable energy sources (RES)

Table 1 indicates that the total gross production from renewable energy sources (RES) amounts to 244.5 Mtoe in the year 2020. The largest contributions of renewable energy originate from heating and cooling (RES-H/C, 46% in 2020) and from renewable electricity (RES-E, 42% in 2020). Renewable transport (RES-T) contributes 13% to the overall renewable energy in 2020. On average this projection results in an annual growth for overall renewables of approximately 6% annually for the period 2010 - 2020. The presented data have been taken from the aggregate table in the individual NREAPs[4].

Looking at the overall growth rates per renewable energy type, it can be observed that the growth rates are smallest for renewable heating and cooling (between 4.4% and 5.7% annually, depending on the period), and that renewable transport is growing fastest (7.1% to 8.5% annually, with a very

[1] At http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009L0028:EN:NOT the Renewable Energy Directive is available for download in all European languages.

[2] The Template is available from http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT.

[3] At http://www.ecn.nl/nreap the report, the database and the image files are available for download.

[4] The aggregate table mentioned here refers to the NREAP Template Table 4a, see footnote 2 .

high growth rate for the period 2005 - 2010 (31.2% per year, caused by the relatively low energy contribution of 3.9 Mtoe for 2005). Renewable electricity has a growth rate of 6.0% to 6.7% annually. It should be noted however that these growth rates are *average* values, and that the conventional renewable technologies (hydropower electricity, solid biomass heating) constitute a large part of the renewable energy stock. From the summary section on detailed RES-specific projections (starting on page 7) it can be observed that average growth rates for new renewables (wind power, solar electricity and solar thermal energy, heat pumps and biofuels for example) are significantly higher (Tables 6, 8 an 10).

Gross final energy consumption

The NREAPs all provide projections for gross final energy consumption in the period 2010 – 2020. Most Member States have specified two scenarios: a '*reference*' and an '*additional energy efficiency scenario*'. Gross final energy consumption has been reported for electricity, heating and cooling and transport separately.

The gross final energy consumption according to these two scenarios for some Member States has been reduced in order to compensate for a relatively large share of aviation in their gross final consumption of energy (see Article 5.6 in the Renewable Energy Directive (2009/28/EC) and the introduction section on page 91. This results in a value '*before aviation reduction*' and an a value '*after aviation reduction*'. Table 2 presents for the reference scenario the resulting EU-27 consumption data, relative shares and average annual growth rates. Table 3 presents the same for the additional enery efficiency scenario.

For the purpose of calculating the overall renewable share the relevant parameter is the gross final energy consumption after aviation reduction (in Table 3 the last row, indicating '*Total after aviation*'. In the year 2020 this value amounts to 1180 Mtoe.

Table 1: *Total contribution from renewable energy sources (RES) for all 27 European Union Member States. This table has been compiled based on the aggregate RES values as specified in the NREAPs. See report Tables 54 to 57 (pages 38 to 41) for country-specific details.*

	Energy				Share	Average annual growth		
	2005 [Mtoe]	2010 [Mtoe]	2015 [Mtoe]	2020 [Mtoe]	2020 [%][a]	2005 – 2010 [%/year]	2010 – 2015 [%/year]	2015 – 2020 [%/year]
RES-E	41.1	55.0	76.2	103.1	42	6.0	6.7	6.2
RES-H/C	54.7	67.9	84.8	111.6	46	4.4	4.5	5.7
RES-T	3.9	15.1	21.3	32.0	13	31.2	7.1	8.5
RES-T*[b]	4.1	15.8	22.8	35.3	-	30.8	7.6	9.1
Total RES	98.7	137.0	180.9	244.5	100	6.8	5.7	6.2

[a] The percentage refers to the share of the renewable energy types (electricity, heating and cooling and transport) in total renewable energy in the year 2020.

[b] In 'RES-T*' the amount of renewable energy in transport is reported according to the Renewable Energy Directive (2009/28/EC). Renewable electricity in electric road vehicles is to be accounted for 2.5 times the energy content of the input of electricity from renewable energy sources (Article 3.4c). Moreover, the contribution made by biofuels produced from wastes, residues, non-food cellulosic material, and ligno-cellulosic material is to be considered twice that made by other biofuels (Article 21.2).

All 27 European Union Member States are considered in this table. This concerns the following countries: Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovenia, Slovakia, Spain, Sweden and the United Kingdom.

Table 2: *Total gross final energy consumption in the reference scenario for all demand sectors for the aggregate of all 27 European Union Member States. See Tables 44, 46, 48, 50 and 52 for details.*

	Energy				Share	Average annual growth		
	2005 [Mtoe]	2010 [Mtoe]	2015 [Mtoe]	2020 [Mtoe]	[%][a]	'05 – '10 [%/year]	'10 – '15 [%/year]	'15 – '20 [%/year]
Electricity	268	286	307	329	25	1.3	1.4	1.4
Heating and cooling	552	556	569	581	44	0.1	0.5	0.4
Transport	299	321	336	349	27	1.5	0.9	0.7
Total before aviation	1166	1213	1266	1317	100	0.8	0.9	0.8
Total after aviation	1162	1208	1259	1307	99	0.8	0.8	0.8

[a] The percentage refers to the share of the demand sectors (electricity, heating and cooling and transport) in total gross final energy consumption before aviation reduction in the year 2020.

Table 3: *Total gross final energy consumption in the additional energy efficiency scenario for all demand sectors for the aggregate of all 27 European Union Member States. See Tables 45, 47, 49, 51 and 53 for details.*

	Energy				Share	Average annual growth		
	2005 [Mtoe]	2010 [Mtoe]	2015 [Mtoe]	2020 [Mtoe]	[%][a]	'05 – '10 [%/year]	'10 – '15 [%/year]	'15 – '20 [%/year]
Electricity	268	283	293	304	26	1.1	0.7	0.7
Heating and cooling	552	543	532	520	44	-0.3	-0.4	-0.4
Transport	299	313	315	312	26	0.9	0.1	-0.2
Total before aviation	1166	1189	1191	1189	100	0.4	0.0	0.0
Total after aviation	1162	1184	1184	1180	99	0.4	0.0	-0.1

[a] The percentage refers to the share of the demand sectors (electricity, heating and cooling and transport) in total gross final energy consumption before aviation reduction in the year 2020.

The share of renewable energy in gross final energy consumption

Based on the abovementioned parameters, Table 4 integrates the EU-27 contribution from renewable energy sources (the denominator in the quotient for calculating the share of renewables, available from Table 1) and the gross final energy consumption (the numerator, available from Tables 2 and 3). From this table it can be seen that in the year 2020 the overall share of renewables in the 'additional energy efficiency scenario' after applying the aviation reduction slightly overshoots the target, arriving at 20.7%. In the reference scenario the EU-27 target of 20% renewable energy in the year 2020 is not being met; this is a logical result of the fact that all projections have been designed to meet the target for the additional energy efficiency scenario. The 'aviation reduction' applied to the gross final energy consumption results in an increase of the overall renewable share of 0.1%-point (from 20.6% to 20.7%).

Table 4 also presents the share of renewables in transport according to the Directive definition (see table footnote *b*). For the year 2020 the target largely surpasses the target of 10%: a share of 11.3% is being reached.

Table 4: *Overall renewable energy share in the aggregate of all 27 European Union Member States. Data calculated from Table 11 on renewable energy and Tables 2 and 3 on gross final energy consumption according to the two scenarios. The 'additional efficiency scenario' after aviation reduction is leading for calculating the renewable energy share.*

	Reference scenario				Additional efficiency scenario			
	2005 [%]	2010 [%]	2015 [%]	2020 [%]	2005 [%]	2010 [%]	2015 [%]	2020 [%]
Electricity	15.3	19.3	24.9	31.3	15.3	19.4	26.0	34.0
Heating and cooling	9.9	12.2	14.9	19.2	9.9	12.5	15.9	21.4
Transport[a]	1.3	4.7	6.3	9.2	1.3	4.8	6.8	10.2
Transport target[b]	1.4	4.9	6.8	10.1	1.4	5.0	7.2	11.3
Total before aviation reduction	8.5	11.3	14.3	18.6	8.5	11.5	15.2	20.6
Total after aviation reduction	8.5	11.3	14.4	18.7	8.5	11.6	15.3	20.7

[a] The share for transport simply expresses the share of RES-T (excluding double counting of renewable electricity, hydrogen and biogas in transport, as specified in Article 5.8 in the Directive) in gross final energy consumption and is not to be interpreted as the renewable share in transport.

[b] In 'Transport target' the share of renewable energy in transport is reported according to the Renewable Energy Directive (2009/28/EC). See footnote *b* in Table 1.

Detailed information from RES-specific projections

Renewable electricity (RES-E)

Table 5 shows the breakdown of the renewable electricity technologies into subcategories (where applicable) and Table 6 shows calculated growth rates. For new renewables such as wind power, solar PV and tidal, wave and ocean energy double-digit growth rates occur. It is interesting to note that the growth rates decline over time: for most technologies the average annual growth rate is higher for the period 2010 – 2015 than for 2015 – 2020. For individual countries data can be found in the tables on growth rates in the technology-specific chapters of the report.

Taking a closer look at the mix of renewable electricity technologies for the year 2020 (Table 5), it can be observed that the most important contribution is expected from wind power (40.6% of which onshore wind power contributes 28.2%-point). The second largest technology is expected to be hydropower (30.4% of all RES-E in 2020, of which large hydropower takes 25.0%-point). Biomass electricity is responsible for 19.1% and solar electricity for 8.5% (6.9%-point from photovoltaics).

Renewable heating and cooling (RES-H/C)

Table 7 shows the contribution of the renewable heating and cooling technologies in detail and Table 8 shows calculated growth rates. For renewable heating and cooling the largest share in the year 2020 is from biomass (77.6%), notably solid biomass (69.2%). Second is renewable energy from heat pumps (10.9%), followed by solar thermal (5.6%) and deep geothermal heat (2.3%). For Romania the technology breakdown of renewable heating and cooling is not available from the NREAP. The Romanian total RES-H/C value has been added in the value for 'Total renewable heating and cooling' in order to make sure to have a correct value for the total contribution of RES-H/C. Looking at Table 8 it can be seen that growth rates generally are higher for the non-biomass options (except biogas).

Renewable energy in transport (RES-T)

Table 9 shows the contribution of the renewable transport energy carriers and Table 10 shows calculated growth rates. According to this table, biodiesel has the largest contribution in 2020 (64.8%), followed by bio-ethanol / bio-ETBE (21.7%). For Romania the technology breakdown of renewable transport is not available from the NREAP. The total RES-T value has been added in the value for 'Total renewable transport' in order to make sure to have a correct value for the total contribution of RES-T. The tables in the report (see the page numbers in the last column of Table 9) provide more information about the shares of Article 21.2 biofuels and imported biofuels. Renewable electricity also has a significant contribution, but this does not count towards the overall renewable energy production as specified in Article 5.1 of the Directive. None of the 27 European Member States project a contribution from renewable hydrogen in transport.

Hydrothermal heat pumps	0.0	0.2	0.3	0.5	0.5	0.2	*57*
Renewable energy from heat pumps (subtotal)	0.6	4.0	7.2	12.1	10.9	4.9	*57*
Total renewable heating and cooling[d]	54.6	67.8	84.7	111.5	100.0	45.4	-

[a] The percentage refers to the share of the individual technologies in total renewable heating and cooling in the year 2020.
[b] The percentage refers to the share of the individual technologies in total renewable energy (electricity, heating and cooling and transport) in the year 2020.
[c] In 'biogas' the value for 'Bio-SNG for grid feed-in' as specified in the Dutch NREAP has been included.
[d] The Romanian total RES-H/C value has been added in the value for ŚTotal renewable heating and coolingŠ. The percentages of the technology breakdown therefore sum to 96.4% instead of 100%.

Table 8: *Average annual growth for renewable heating and cooling (RES-H/C) energy for all 27 European Union Member States*

	2005 – 2010 [%/year]	2010 – 2015 [%/year]	2015 – 2020 [%/year]
Geothermal	9.9	14.3	14.5
Solar thermal	16.0	15.7	15.9
Solid biomass	2.4	3.3	4.0
Biogas[a]	18.7	13.8	11.8
Bioliquids	26.3	2.3	1.5
Biomass (subtotal)	3.6	3.6	4.3
Aerothermal heat pumps	75.1	10.2	10.7
Geothermal heat pumps	36.9	14.9	12.1
Hydrothermal heat pumps	50.6	9.0	9.3
Renewable energy from heat pumps (subtotal)	45.5	12.5	10.9
Average renewable heating and cooling	4.4	4.6	5.7

[a] In 'biogas' the value for 'Bio-SNG for grid feed-in' as specified in the Dutch NREAP has been included
The growth rates for subcategories of technologies in this table have been calculated from the projections in Table 7

Table 9: *Total renewable transport (RES-T) energy for all 27 European Union Member States*

	2005 [Mtoe]	2010 [Mtoe]	2015 [Mtoe]	2020 [Mtoe]	Share [%][a]	Share [%][b]	*Page*
Bioethanol / bio-ETBE	0.5	2.8	4.8	7.1	21.7	2.9	*58*
Biodiesel	2.4	10.8	14.3	21.3	64.8	8.6	*59*
Hydrogen from renewables	0.0	0.0	0.0	0.0	0.0	-	*60*
Renewable electricity[c]	1.1	1.3	1.9	3.1	9.5	-	**??**
Other biofuels	0.2	0.2	0.3	0.8	2.4	0.3	*62*
Total renewable transport[d,e]	4.2	15.3	21.7	32.8	100.0	-	-
Total renewable transport Article 5.1[f]	3.1	14.1	19.8	29.7	90.5	12.1	-

[a] The percentage refers to the share of the individual technologies in total renewable transport in the year 2020.
[b] The percentage refers to the share of the individual technologies in total renewable energy (electricity, heating and cooling and transport) in the year 2020. This value is not available for electricity and hydrogen from renewable energy, see footnote *d*.
[c] In 'Renewable electricity' the 'non-road electricity consumption' has not been included for Romania.
[d] The value 'Total renewable transport' has not been corrected as indicated in Article 5.1 of Directive 2009/28/EC.
[e] For Romania the technology breakdown of renewable transport is not available from the NREAP. The total value for RES-T from the Romanian NREAP (Template Table 4b) has been added in the value for 'Total renewable transport', corrected for the 'road electricity consumption' already included in 'Renewable electricity'. The percentages of the technology breakdown therefore sum to 98.4% instead of 100%.
[f] The 'Total renewable transport Article 5.1' has been calculated by substracting electricity and hydrogen from renewable energy values from 'Total renewable transport'. This is to avoid double counting as indicated in Article 5.1 of Directive 2009/28/EC. The category 'other biofuels' has not been applied for the correction. The resulting values are used for determining the overall renewable energy production in Table 11.

Table 10: *Average annual growth for renewable transport (RES-T) for all 27 European Union Member States*

	2005 – 2010 [%/year]	2010 – 2015 [%/year]	2015 – 2020 [%/year]
Bioethanol / bio-ETBE	39.5	11.6	8.0
Biodiesel	35.4	5.7	8.3
Hydrogen from renewables	n.a.	n.a.	n.a.
Renewable electricity	3.9	8.9	9.8
Other biofuels	1.2	5.0	23.7
Average renewable transport	29.6	7.2	8.6

Table 11: *Total contribution from renewable energy sources (RES) for all 27 European Union Member States. These values have been calculated from the detailed NREAP projections and differ slightly from the values presented in Table 1, which has been compiled based on aggregate RES values as available from the NREAPs as well. See Tables 7 to 10 for details.*

	Energy				Share	Average annual growth		
	2005 [Mtoe]	2010 [Mtoe]	2015 [Mtoe]	2020 [Mtoe]	[%][a]	2005 – 2010 [%/year]	2010 – 2015 [%/year]	2015 – 2020 [%/year]
RES-E	42.3	56.1	77.6	104.6	43	5.8	6.7	6.2
RES-H/C	54.6	67.8	84.7	111.5	45	4.4	4.6	5.7
RES-T [b]	3.1	14.1	19.8	29.7	12	35.0	7.1	8.5
Total RES	100.0	138.0	182.0	245.8	100	6.6	5.7	6.2

[a] The percentage refers to the share of the renewable energy types (electricity, heating and cooling and transport) in total renewable energy in the year 2020

[b] Total renewable energy for transport has been corrected for electricity and hydrogen from renewable energy sources as indicated in Article 5.1 of Directive 2009/28/EC. See Table 9.

All 27 European Union Member States are considered in this table. This concerns the following countries: Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovenia, Slovakia, Spain, Sweden and the United Kingdom.

Renewable energy share according to detailed projections

Table 11 indicates that the total gross production from renewable energy sources (RES) (excluding pumped storage hydropower and for renewable transport corrected for double counting according to Article 5.1 of the Directive) amounts to 245.8 Mtoe in the year 2020[5]. Note that this value, calculated from the detailed renewable energy projections for RES-E, RES-H/C and RES-T, differs from the value reported in Table 1 (244.5 Mtoe). As the deviations are relatively small, it can be observed that the different contributions from renewable energy largely are in line with the data presented in Table 1. Renewable heating and cooling contributes 45% in 2020 instead of 46% and from renewable electricity 43% in 2020 instead of 42%) . Renewable transport (RES-T) remains unchanged with a 12% contribution to the overall renewable target, as does the value for the average annual growth.

Using these slightly different RES projections as input to calculate the shares in gross final energy consumption, the resulting shares also will be different. This is displayed in Table 12. For the year 2020 the 'additional efficiency scenario after aviation reduction' results in a share of 20.8%, slightly higher than the 20.7% reported in Table 4. The reason for this is that some NREAP documents have internal inconsistencies, i.e. aggregate values do not match between tables. This can be observed also from the country tables in this report (pages 63 to 89).

Based on the detailed projections no share of renewable transport has been calculated.

Derived data in this report

The secondary data as depicted in the report show the merits of presenting the data using derived indicators: large countries with high projections for certain renewables countries are averaged out when presented on a per capita or a per surface area basis. The indicator on full load hours shows expected deviations between Southern European countries and Northern European countries for solar electricity technologies.

[5]The NREAP for Romania doesn't pronounce on detailed projections for renewable heating and cooling and renewable transport (Template Tables 11 and 12 are missing), these projections have been taken from the data overview presented in Tables 54 to 57 for the purpose of this overview table.

Table 12: *Overall renewable energy share in the aggregate of all 27 European Union Member States. Data calculated from Table 1 on renewable energy (based on detailed projections) and Tables 2 and 3 on gross final energy consumption according to the two scenarios. The 'additional efficiency scenario' after aviation reduction is leading for calculating the renewable energy share. Note that the value 20.8% differs slightly from the value 20.7% from Table 4. This is caused by internal inconsistencies in the NREAPs.*

	Reference scenario				Additional efficiency scenario			
	2005 [%]	2010 [%]	2015 [%]	2020 [%]	2005 [%]	2010 [%]	2015 [%]	2020 [%]
Electricity	15.8	19.6	25.3	31.8	15.8	19.8	26.5	34.5
Heating and cooling	9.9	12.2	14.9	19.2	9.9	12.5	15.9	21.4
Transport[a]	1.0	4.4	5.9	8.5	1.0	4.5	6.3	9.5
Total before aviation reduction	8.6	11.4	14.4	18.7	8.6	11.6	15.3	20.7
Total after aviation reduction	8.6	11.4	14.5	18.8	8.6	11.7	15.4	20.8

[a] The share for transport simply expresses the share of RES-T (excluding double counting of renewable electricity, hydrogen and biogas in transport, as specified in Article 5.8 in the Directive) in gross final energy consumption and is not to be interpreted as the renewable share in transport. Based on the detailed projections no share of renewable transport has been calculated.

For the Netherlands, Slovenia and Finland the 'Reference scenario' is not available. For these Member States, projections have been taken as reported for the 'Additional efficiency scenario', see Table 45.

For Malta and Poland no data are available for the year 2005. Consequently, the value reported here as EU total in 2005 is actually the value for the EU minus Malta and Poland (together 13.1 Mtoe).

For the ‘additional energy efficiency’ scenario all Member States have provided data.
For Malta and Poland no data are available for the year 2005. Consequently, the value reported here as EU total in 2005 is actually the value for the EU minus Malta and Poland (together 12.3 Mtoe).

For the ‘additional energy efficiency’ scenario all Member States have provided data.
For Malta and Poland no data are available for the year 2005. Consequently, the value reported here as EU total in 2005 is actually the value for the EU minus Malta and Poland (together 32.4 Mtoe).

For the Netherlands, Slovenia and Finland the 'Reference scenario' is not available. For these Member States, projections have been taken as reported for the 'Additional efficiency scenario', see Table 49.

For Malta and Poland no data are available for the year 2005. Consequently, the value reported here as EU total in 2005 is actually the value for the EU minus Malta and Poland (together 17.0 Mtoe).

This dataset presents gross final energy consumption. It is the only cross-section of the NREAP data that is complete, so in this table no corrections have been applied (see also the footnotes in Tables 50, 52 and 53).

For Malta and Poland no data are available for the year 2005. Consequently, the value reported here as EU total in 2005 is actually the value for the EU minus Malta and Poland (together 61.8 Mtoe).

Table 52: *Total final energy consumption [ktoe] after aviation reduction for the reference scenario*

Not for all Member States the aviation reduction has been applied. This table presents all data for the total consumption after reduction for aviation limit for Denmark, Ireland, Spain (only for 2015 – 2020), Cyprus, Luxembourg, the Netherlands, and the United Kingdom. For the remaining countries, the values *before* the aviation reduction have been displayed. This regards Belgium, Bulgaria, the Czech Republic, Germany, Estonia, Greece, France, Italy, Latvia, Lithuania, Hungary, Malta, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland, Sweden, . See also the third column in the table.

For the Netherlands, Slovenia and Finland the 'Reference scenario' is not available. For these Member States, projections have been taken as reported for the 'Additional efficiency scenario', see Tables 51 (Slovenia and Finland) and 53 (the Netherlands).

For Malta and Poland no data are available for the year 2005. Consequently, the value reported here as EU total in 2005 is actually the value for the EU minus Malta and Poland (together 61.8 Mtoe).

For Spain the aviation reduction only applies to the years 2015 – 2020 in the 'Reference scenario'.

Table 53: *Total final energy consumption [ktoe] after aviation reduction for the additional energy efficiency*

[a] As reported in Template Table 4a. The Template is available from http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT.

[b] Calculated indicator: contribution of each Member State to '*All RES*' as reported in Table 4a.

[c] 'RES-T target' refers to the row indicated (J) in Template Table 4b and takes into account Article 4c of the Directive (applying a factor 2.5 to electricity from renewable energy sources consumed by electric road vehicles) and Article 21.2 (considering twice the contribution made by biofuels produced from wastes, residues, non-food cellulosic material and ligno-cellulosic material).

[d] Calculated result: sum of columns '*RES-E*', '*RES-H/C*' and '*RES-T*' as reported in Template Table 4a.

[e] Difference between column '*All RES*' and the sum of columns '*RES-E*', '*RES-H/C*' and '*RES-T*' as reported in Template Table 4a (see also footnote *d*). Since none of the 27 Member States projected a contribution from renewable hydrogen in transport, the difference should be equal to the projection for renewable electricity in transport (Article 5.1 of the Renewable Energy Directive 2009/28/EC, http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009L0028:EN:NOT).

[f] Renewable electricity in transport ('*road transport*' and '*non-road transport*') as reported in Template Table 12 (for Romania only '*renewable electricity in road transport*' from Template Table 4b has been considered).

Table 55: *Aggregate RES according to NREAP for the year 2010 (Template Table 4a, Table 4b (RES-T for target) and Table 12 (RES-E in road vehicles)*

[a] As reported in Template Table 4a. The Template is available from http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT.

[b] Calculated indicator: contribution of each Member State to '*All RES*' as reported in Table 4a.

[c] 'RES-T target' refers to the row indicated (J) in Template Table 4b and takes into account Article 4c of the Directive (applying a factor 2.5 to electricity from renewable energy sources consumed by electric road vehicles) and Article 21.2 (considering twice the contribution made by biofuels produced from wastes, residues, non-food cellulosic material and ligno-cellulosic material).

[d] Calculated result: sum of columns '*RES-E*', '*RES-H/C*' and '*RES-T*' as reported in Template Table 4a.

[e] Difference between column '*All RES*' and the sum of columns '*RES-E*', '*RES-H/C*' and '*RES-T*' as reported in Template Table 4a (see also footnote *d*). Since none of the 27 Member States projected a contribution from renewable hydrogen in transport, the difference should be equal to the projection for renewable electricity in transport (Article 5.1 of the Renewable Energy Directive 2009/28/EC, http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009L0028:EN:NOT).

[f] Renewable electricity in transport ('*road transport*' and '*non-road transport*') as reported in Template Table 12 (for Romania only '*renewable electricity in road transport*' from Template Table 4b has been considered).

Table 58: *Projected hydropower electric capacity [MW] for the period 2005 - 2020, broken down into capacity ranges and pumped storage capacity*

See Table 59 on page 43 for corresponding hydropower electricity production data.

Country information: *Total hydropower* in the NREAP for France and Sweden includes pumped storage capacity. The value for *All Member States (total)* should thus be lowered with approximately 4.3 GW in 2005 to 6.8 GW in 2020.

A breakdown in capacity ranges has not been provided for Bulgaria, the Netherlands and the United Kingdom. Therefore, the sum of all categories is lower than the value for *All Member States (total)*.

Table 59: *Projected hydropower electricity generation [GWh] for the period 2005 - 2020, broken down into capacity ranges and pumped storage capacity*

See Table 67 on page 51 for corresponding wind power electricity production data.

Because for Finland and Belgium no breakdown into onshore and offshore wind power has been specified after 2005 the sum of the subcategories in 2010, 2015 and 2020 is lower than the value for *All Member States (total)*. Poland reports micro-wind separately from onshore wind, which results in a difference between onshore and total capacity.

Table 67: *Projected wind power electricity generation [GWh] for the period 2005 - 2020, broken down into onshore wind and offshore wind*

See Table 66 on page 50 for corresponding wind power capacity data.

For Finland no breakdown into onshore and offshore wind power has been specified after 2005. For Ireland the energy production has not been allocated to either onshore or offshore wind power for the year 2005. Therefore, the sum of the subcategories is lower than the value for *All Member States (total)*. Poland reports micro-wind separately from onshore wind, which results in a difference between onshore and total electricity production.

See Table 69 on page 53 for corresponding biomass electricity electricity production data.

For Finland no breakdown into biomass input types has been provided. Therefore, the sum of all categories is lower than the value for *All Member States (total)*.

For Romania the contribution of renewable electricity in transport has not been specified in Template Table 12, but from Template Table 4a the information is available for ‘electricity in road transport’. The data from Template Table 4a have been used in this overview table. In this way, the Article 5.1 correction as introduced in Table 9 on page 11 is performed for road transport, but double counting of RES-E in non-road transport still occurs (the data for ‘electricity in non-road transport’ are not available from the Romanian NREAP).

The German Action Plan defines a *data range* for both 'total' and 'Article 21.2' other biofuels. In the table the range is provided, but the total value for all Member States uses the average value of the range (70.5 ktoe for 'Article 21.2' other biofuels and 217.0 ktoe for 'total other biofuels' in 2020).

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

		additional energy efficiency[f]		n.a.				0.0		n.a.				0.0		n.a.				0.0		n.a.				0.0	*37*
Target		Transport fuels target																								10.0	-
		Overall renewable target[g]						16.0						17.8						20.1						25.0	*25*

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT

[a] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector-total (RES-E, RES-H/C or RES-T, see values highlighted in bold).
[b] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in total RES (if applicable including co-operation mechanisms, see value highlighted in bold).
[c] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the sector total of the final gross energy consumption ('*Additional energy efficiency scenario*' only), see values highlighted in bold).
[d] The percentages refer to the values in the column '[ktoe]' and express the share of the renewable technology in the total final gross energy consumption (*before* aviation reduction of the *Additional energy efficiency scenario*), see value highlighted in bold).
[e] Art. 21.2 adjustment refers to double counting of certain biofuels (times 2) and and renewable electricity in road transport (times 2.5).
[f] In 'Final consumption' values for the year 2005 refer to the 'base year' in Template Table 1 (see Table 44 (page 28) to Table 53 (page 37).)
[g] For the years 2005 and 2020 the shares as defined in Annex I of Directive 2009/28/EC are presented, for the years 2010 and 2015 it is referred to the trajectory periods 2011-2012 and 2015-2016.
General: where is referred to Tables 1, 4a, 10a/b, 11 and 12 it is meant to the Template, prepared by the European Commission and available for download at http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32009D0548:EN:NOT
